

**TRANE**

*It's Hard To Stop A Trane.*

# Variable Speed Gas Furnaces

Staying warm in the winter season is just a fraction of what you need. Doing it efficiently day and night, even on the record lows, that's what a Trane furnace gives you. Innovative furnaces with efficiency in mind.

## XC95m Fully Modulating Variable Speed

Trane's top of the line furnace features the industry's first true communicating, fully modulating gas valve, and an **AFUE** of up to **97.3%**. Thanks to ComfortLink II technology, the XC95m works with other system components to learn and adapt to your specific home, providing truly optimized, customized comfort and efficiency.

## XV95 2-Stage Variable Speed

Two-stage heating uses gradual, steady warmth for efficiency, with plenty of reserve heat on standby when needed. The XV95 can achieve up to **97% AFUE**. During the summer, Comfort -R technology slows air speed during startup for quieter operation and more precise humidity control.
